

»Do you have higher goals?«

»Yes!«

»

If you want to bring this world forward, you cannot carry on the conventional and average. You know, you must be ready for the new, for innovation. The best is just barely good enough.

«

Dieter Scheffknecht

1990-1999

Under this idea and conviction, a group of enthusiastic technicians led by the engineer Dieter Scheffknecht founded a company for Human Technology. Right in the heart of Europe, at Lake of Constance, where the countries Switzerland – Germany – Austria and Liechtenstein are touching. Right where the special deliberation of these people have led to a worldwide unique harmony of progress and still completely intact nature.

New developments and patents for air purification and filter technology (MANTECH, RP-radial, power pac) turn key projects
Engagement in clean room projects (GMPA+B... ISO5... US Fed Std. class 100)

2000-2005

Focus on filter technology under brand filtex®
Establishment of logistic center in Hard at Lake Constance
Internationalization of the filtex® brand
AFTL Test Champion with filtex MGP620 ceiling filter.
filtex - Slovenia manufacturing plant
filtex presents for the first time exclusively energy-saving filters „durotex“

2006-2010

filtex Austria Logistic Center and foundation of the head-quarter of filtex AG in Liechtenstein-Schaanwald.
All over certification, of manufacturing, sales and development, according to ISO9001 Quality Management System
Engagement in Asia. With headquarter in Shanghai
Expansion of filter production in China with EPA HEPA ULPA filters under cleanroom conditions.
Customer benefit increase due to new optimization services by application specialists. The unique TFM - Total Filter Management process is ISO9001 certified.

2011-2018

Further innovations and patents: „doubletex“, „narrow pleat“, „blue“, „ripax“, „glass“, „vpac“, „celpac“
Hygiene Certificate Dr. Raabe, SRRT Switzerland-membership
Innovation and assortment expansion „Clean Room Components“
Complete supplier for the industry with assortment expansion
On industrial filters, customer commissioning System
Construction Quality Management System according to ISO 9001:2015
Certified by SQS-Switzerland

2019-2022

Prompt answer to Corona pandemic: filtex uniquely develops “coronastop” pocket filters in order to make all AHU air handling units safe. (OFI virus test certificate with retention capacity over 99%) FFP1 protective masks “breath” in various comfort versions. Mobile “particle counter ISO16890” – measuring indoor air quality becomes part of safety inspections

2023-2025

Filtex introduces the „EMSOC“ a real-time monitoring system for HVAC (Heating, Ventilation, and Air Conditioning) systems with high process quality requirements (among other things, PM0.1, PM2.5, and PM3 particle sizes are monitored).
Innovation product line „explos“ - Energy Saver pocket filters for explosive-conditions. Innovation paint stop filter „blue“ for surface technology.
Innovation „doublesheet“ energy saver high performance pocket filter

2026-

The ISO9001 certified TFM optimization process now results in a benefit calculation and thus documents the achieved energy savings and the profit in Euros.
Innovation: AFTL Test Champion „filtex MGP621“ with ePM10 > 75%, an absolute new quality level for spray booth. „reduce your footprint“ strategy includes innovation with clear orientation to energy saving and customer benefit.
That means, save money with smart filter technology from filtex and additionally save our planet ...

**Stand in person for
 what you say...**
 «

filtex specialists provide additional benefit through application optimization. We take responsibility for our promises in person. This optimization process shapes our very personal customer relationship.

The TFM-Total Filter Management optimization process is certified according to the Quality Management System ISO 9001:2015.

We keep our promises

»
Both is possible...
«

Advanced filter technology from filtex not only provides the so important, significant customer benefit to your company.

But additionally, you and we together. We do an enormous contribution to the conservation of world`s environment
How is this miracle possible? Thanks to the high energy efficient filter technology „energy saver“ from filtex.
It is very important and we are proud to say: “with any applied filtex - filter we make a step forward to protect our planet, a step for all.”

Let`s go new ways together.
We do make sense.
